

Group 3

Safety Items.

National Fire Protection Assoc. NFPA70

OSHA -has adapted MSHA is shortly behind

As well. For class 2 - 4 rated equipment

Proving and providing ARC flash rating for all

Your electrical equipment .

Ask your Vendors to provide you the ratings of there equipment they have sold you or about to.

Do studies on your site , when a person has to suit up

In a class 4 situation , did we really need to put him in

situation .

New Innovations and Technology

LED lighting installed inside house of the drag line replacing

old ballast start bulbs...longer lasting , = safer plus - was

Lost in lumus , but more directed light toward the Motors

And Gen sets

757 Page Unit A/C unit less maint. Cost

comment made by Edward Barnett

North American Coal home address 105 Stevens blvd

Problems and solutions

MSHA issue locking out single breaker inside a breaker box

By using and using a master lock luggage lock.

Stay sharp on repairs You turn in for vehicles you drive

And follow up that repairs have been donedon't always

Rely on others

480 3phase called for short" lil blue" breaker switch

Also called a Meltrix Plug.

Future Topics

Arc flash

MSHA refresher classes draw in our younger crowd we need to be focusing in on

PRE MSHA GREEN CARD CLASSES

Mine demo's" for problems they have had and how they corrected them

Future Locations

Gillette Tour ARCH or PEABODY property
